

CSG CHEMICAL FAMILY

The CSG group of products are ideal for a complete food approved disinfection program for store and food service sanitation. Use CSG 1000 and 2000, or CSG 1000 and 3000 as a complete disinfectant program, and use CSG 4000 for your grease traps and drains. For more information, please refer to the information sheet for the individual product.

CSG 1000

CSG 1000 is a concentrated liquid cleaner disinfectant designed as part of the CSG FOOD SERVICE SYSTEM for cleaning and disinfecting food, meat, and poultry processing areas. CSG 1000 can be used as a one-step cleaner-disinfectant-sanitizer or can be used in combination with CSG 2000 to leave a clean, rinsed and sanitized surface.

CSG 2000

CSG 2000 is a final sanitizer rinse for use with CSG 1000 or CSG 3000 as part of the total CSG FOOD SERVICE SYSTEM. Using a dual quaternary ammonium sanitizer, CSG 2000 provides effective sanitizing when used as directed.

CSG 3000

CSG 3000 is a blended liquid product designed as part of the CSG FOOD SERVICE SYSTEM for cleaning of inclined surfaces in food, meat, poultry and fish processing areas. It contains a high level of grease-cutting builders as well as high foaming surfactants. This combination allows production of thick stable foam which clings to vertical surfaces and penetrates deeply into oily, greasy residues.

CSG 4000

CSG 4000 is a powerful 100% organic solvent blended specifically for rapid and safe cleaning of grease traps and drain pipes. It contains deep penetrating citrus solvent plus emulsifiers for rapid dissolving and breakup of grease and oils. Water rinsability is achieved by coupling agents that disperse soil particles and allow complete flushing of surfaces.
