VST Program Expansion — Grande Prairie

About a year ago, we started up our Visiting Service Technician (VST) program in Fort McMurray. Since then, we have been able to help a number of our Fort McMurray customers to reduce the cost on their service visit. Now it is time to extend our focus to the Grande Prairie area.

The idea behind the program is to allow our customers to share technician travel costs by sending our technician to an area at a predetermined time, and visiting multiple customers through the day. The customer in turn is charged a flat rate for the visit instead of a total of work and travel time. Have us work on up to two of your machines for a \$100 flat travel rate.

For more information on our VST program, please visit www.wegreer.com/service/vst.php

Preventative Maintenance

Recently, we expanded our preventative maintenance chart offering at a customer's request, and we thought this would be a great opportunity to share this information with all of our valued customers. Preventative maintenance tasks are those things that you do periodically to keep your vacuums, automatic scrubbers, extractors, and burnishers functioning at their best.

We now have a total of seven different preventative maintenance charts, including: Automatic Scrubber - Ride-on, Automatic Scrubber - Walk-Behind, Burnisher, Extractor, C3 Cleaning Companion, Vacuum, and Wet/Dry Vacuum. Each chart takes you through the tasks you need to regularly perform on your equipment, in brief and easy to follow descriptions and pictures.

As always, there are a handful of tasks which are more technical in nature, and may require a technician visit. This is where our Programmed Maintenance (PM) program comes in. We recommend quarterly PM visits on automatic scrubbers, semi-annual visits on extractors, and annual visits on C3s and burnishers. Visit our Programmed Maintenance page at www.wegreer.com/service/maintenance.php for more information.

We also carry a number of other process charts that cover a large variety of topics such as battery maintenance, cleaning a school, food-area disinfection, and many more. Have a look at some of our more popular charts at www.wegreer.com/training/resources.php.

SPECIALS AND SPOTLIGHTS

Prices valid from June 1, 2012 through to August 31, 2012. All used equipment sold as is, where is. All items limited quantity.

Spotlight: New 2012 Green Cleaning Brochure

We carry a fantastic group of environmentally friendly cleaning chemicals called INDO Pro-Portion EV, used in a dilution control system for maximum environmental and cost effectiveness. But environmentally friendly cleaning chemicals are just the first step.

Our Green Cleaning brochure outlines the tools, paper, plastic, and equipment that go hand-in-hand with an environmentally friendly program. Learn why a good matting system is crucial for a green cleaning program,

what makes microfibre an ideal material for cleaning cloths and mops, what paper and plastic products are environmentally certified, and much more.

If you are looking for a cleaning program for LEED certification (Leadership in Energy and Environmental Design), or you are just green conscious, then pick up a copy of the new Green Cleaning Brochure.

Contact us for a copy, or visit our website for a pdf copy. Also, visit our YouTube page for our first information video on EV Sunrise.

Spotlight: SC3000

The SC3000 Compact Rider Scrubber is easier to operate, produces green-cleaning results, and has a patented scrubbing deck that performs the hard work for you. The user-friendly and quiet running SC3000 is ideal for areas with limited access, or are noise-sensitive, such as health care facilities. With a 21 gallon tank, the SC3000 provides over an hour of continuous scrubbing on a single tank of water.

For more information, visit our website. The SC3000 is also profiled on our YouTube page under its European name, the BR652.

Spotlight: ET600 Portable Extractor

The New ET600 Portable Extractor is not your ordinary extractor. The ET600 is cost effective, and is equipped with reliable heating, flexible operation and delivers sustainable cleaning results. It has been given the CRI Seal of Approval, which meets equipment requirements for LEED and GS-42 certification.

For more information on this innovative portable extractor, visit our website.

Special:

SC750 Demo Model Sell-off

Advance's rugged, low-maintenance SC750 scrubber delivers incredible value on a walk-behind platform. High productivity per tankful allows for 84 minutes of continuous scrubbing, which reduces dump/refill cycles and helps provide fast ROI. Call us today for more information!

3356112490 - \$13712.08 (regular \$14856.00)

Special:

Safety Solvent

Safety Solvent is a petroleum-based cleaner that is ideal for tools, equipment and vehicles. Applications include:

- Removal of sticky, stubborn soils
- Lubricant for moving components
- Protective coating for equipment, tools, and parts

Learn more about this great product in our new Product Reference Guide, which is also available on our website.
