

AIRX22

HIGH INTENSITY ODOR COUNTERACTANT SPRAY

AIRX 22 is an instant action odor counteractant that eases foul odors in institutional, industrial and commercial situations. With Airicide® odor counteractant it is designed to change the size and shape of odorous molecules so they are not recognized as the bad odors they would have been. Then, AIRX 22 leaves a pleasant residual aroma to freshen articles on which it is used.

As a space deodorizer, AIRX 22 is superior for spray or fog applications because it travels quickly to every remote part of a room, but has lasting effectiveness. It is excellent as a deodorizer for carpets, draperies, upholstery, bedding, clothing, etc., because it is long-lasting, non-flammable, non-staining and safe for use on colorfast textiles.

DESCRIPTION

AIRX 22 is an institutional grade odor counteractant spray that has been intensified for faster action and longer lasting control of foul odors. It employs Airicide® Odor Counteractant designed to merge with and change odorous molecules so they are not recognized as the foul odor they would have been.

USES

Counteracts malodors from smoke, smoking, pets, pet accidents, cooking, sickness, sewage, garbage, trash, beer, wine, liquor, paint, solvents, insecticides, etc. Erases foul odors in the air, in carpets, upholstery, draperies, bedding, in patient's rooms, restrooms, lockers, compactors, dumpsters, closets, air conditioners, etc.

BENEFITS

AIRX 22 HIGH INTENSITY DEODORIZING SPRAY WITH AIRICIDE® NEUTRALIZES FOUL ODORS with Airicide®, a proprietary odor counteractant designed to link with odor molecules in the air and change their size and shape so that the cilia and olfactory nerves will not perceive the odors as unpleasant.

VERSATILE - AIRX 22 is a unique odor counteractant that can be used as a space spray to ease odors already in the air. Can be sprayed directly on carpets, clothing and other textiles, or sprayed into things such as refuse containers to erase odors there.

COUNTERACTS MALODORS from sickness, human incontinence, animals, pets, pet accidents, sewage, garbage, trash, fats,

oils, cooking, fire, smoke, smoking, liquor, beer, chemicals, paints, solvents, insecticides, etc.

HIGH INTENSITY - Many times the concentration and the lasting ability of typical deodorizers and deodorizing sprays. A quick spray is usually all that is necessary where other products are ineffective.

ECONOMICAL - Each gallon is the equivalent in activity to about 2 dozen aerosol cans, but that's only part of the story. The high intensity of AIRX 22 puts more odor counteractant in every cubic inch of the space or the article treated.

**SAFETY* - Safe to use around animals & pets. To see just how great savings can be, use the chart below to calculate the cost per gallon of the productive contents of your aerosol.
