

AIRX66

SUPER CONCENTRATE NO FILM CLEANER

Most liquid cleaners start as powders that are dissolved and liquefied for easier, more accurate mixing. Because they start as powders, they dry to a powder and a dulling film. AIRX 66 on the other hand is a highly active complex of liquid surfactants that have been heavily chelated to avoid such film, even when used in the hardest water. AIRX 66 thus is ideal for cleaning "wet-look" floors and similar surfaces where dulling film is so apparent. Its high percentage of expensive surfactants and the absence of soap and cheap, inefficient fillers helps AIRX 66 penetrate, lift and suspend soil without redeposition and without need for rinsing - even when used in hard, cold water. With AIRX 66 you use less product, use less effort and do a better cleaning job that is more gentle to the surface being cleaned. And along with improved cleaning AIRX 66 delivers the extra bonus of eliminating unpleasant odors as it is used. As with other AIRX products it contains Airicide that merges with odorous molecules in the air to change their size and shape so that when they reach the nose, the cilia receptors no longer identify the odor as unpleasant.

DESCRIPTION

AIRX 66 is a liquid, all-purpose cleaner with unique abilities in cleaning, free-rinsing and deodorizing. It is 100% synthetic for better removal of greasy, oily soil. It

is highly chelated and made of liquid surfactants rather than powders to avoid leaving a film. And it contains Airicide™ odor counteractant to leave areas fresh smelling wherever it is used.

USES

For no film, no rinse cleaning of polished and unpolished floors including vinyl, vinyl asbestos, asphalt tile, rubber, marble, terrazzo, ceramic tile and concrete. Cleans walls, woodwork, partitions, glass, wood, metal, leather and plastic furniture; bathroom and shower walls, fixtures, etc. For washing automobiles, buses, trucks, etc. Counteracts unpleasant odors as it cleans.

HOW TO USE

May be used in either hot or cold water. For damp mopping polished floors and cleaning non-porous surfaces, use approximately 1/2 ounce per gallon of water. For removal of typical soil from non-polished floors, from walls, woodwork, etc., use approximately 1 ounce per gallon of water. For heavier or greasy soil, use approximately 2 ounces per gallon of water. Only food contact items need be rinsed with potable water.

FEATURES

NO FILM FROM BUILDERS - Complex

free-rinsing. Ideal for cleaning wet-look floors and other high gloss surfaces where the film from other cleaners can be obvious.

NO SOAP FILM - 100% synthetic. Contains no soap so there can be no soap film even when used in the hardest water.

HIGHLY CHELATED - Insures against film from hard water. Even removes film left by previously used cleaners.

HIGHLY CONCENTRATED / HEAVY DUTY - 1/2 ounce per gallon of water is all that's necessary for many uses.

CONTROLLED CLEANING - Removes soil without removing or cutting into the finish or wax.

CONTAINS Airicide - Use with a mop, sponge, trigger spray bottle, pressure washer or automatic scrubber to clean anything non-electrical.

AIRX66

SUPER CONCENTRATE NO FILM CLEANER

SPECIFICATIONS

ODOR COUNTERACTANT	Airicide
pH OF CONCENTRATE.....	11.2 ± 0.5
pH OF 1:100 DILUTION	9.5 ± 0.5
COLOR	bright blue
GLYCOL ETHERS.....	none
ALCOHOL.....	none
PETROLEUM DISTILLATES.....	none
PHOSPHATE, NTA BUILDERS.....	none
Biodegradability	complete
FLASH POINT	none
FOAMING.....	moderate, easy rinsing
SPECIFIC GRAVITY	1.01 ± 0.005 g/mL
SHELF LIFE.....	minimum 2 years at room temperature
