

# INDO 400

emulsifies greasy soil to improve cleaning and prevents dirt redeposition.

**Non-butyl** — Does not contain “butyl” or other glycol ether type solvents yet penetrates better than butyl for grease and inks.

**Low VOC** — Increased concern for Volatile Organic Compounds in workplace areas has meant an increased concern for solvent cleaners. INDO 400 contains less than 5% VOC and low evaporation rate meaning improved air quality.

**Biodegradable** — Waste treatment plants can normally accept and treat the waste from INDO 400. The use of biodegradable citrus derivative means a more environmentally safe product.

**Pleasant odour** — Many cleaners use perfumes or fragrances to mask the powerful solvent odours that people find objectionable. INDO 400 uses no such perfumes but rather relies on the natural “orange” aroma of the citrus additive to provide a fresh clean smell after use.

**Versatile** — INDO 400 will clean up tough jobs that most other water-based products can’t handle. Ink stains are hard to remove even with solvents. INDO 400 penetrates and removes ink deposits with amazing ease.

INDO 400 is a highly concentrated industrial grade degreaser based on the original “positive emulsion” technology. The superior cleaning performance of this technology has been further enhanced by the addition of a unique natural solvent extracted from citrus fruit.

This biodegradable solvent gives accelerated action in penetrating and dissolving oily, greasy soil. It works like a “butyl” cleaner without the hazards of “butyl” type solvents, petroleum distillates or chlorinated solvents that are sometimes required to give solvent action.

INDO 400 is designed to go to work wherever greasy, oily, organic-based soils exist. It’s great for ink too! Use it to clean tile, concrete, marble and terrazzo floors or any other hard surface not affected by water. Cleans and deodorizes typewriters, vending machines, garbage and trash containers, machinery, tools, etc.

**Positive emulsion** — Spontaneously

## APPLICATIONS:

- air conditioners
- air filters
- brick (boilers, fireplaces)
- conveyers
- engines
- exhaust stains
- general maintenance
- kitchen ranges
- light fixtures
- painted surfaces
- printing equipment

**USE:** Dilute with water as required:

LIGHT SOIL - 1:40 to 1:100

MEDIUM SOIL - 1:20 to 1:40

HEAVY SOIL - 1:1 to 1:5

**FORM:** Liquid

**COLOUR:** Orange

**ODOUR:** Citrus

**pH AS SUPPLIED:** 12.7

**pH AS USED:** 11-12

**PHOSPHATES:** None

**FLASH POINT:** None

**BIODEGRADABILITY:** Yes

**WATER SOLUBILITY:** Infinite

**SPECIFIC GRAVITY:** 1.037

**SURFACE SAFETY:** Safe on most common hard surfaces. Always check surface effect first particularly at high strength solutions.

**CAUTION:** Read MSDS thoroughly before using.

**EDMONTON**
