

# AIRX200

## FOAMING INSTANT HAND SANITIZER

It has long been recognized that a critical step in preventing the spread of disease is frequently washing one's hands. Too often that's not possible, or even practical – which led to the introduction of high alcohol gel sanitizers. But it requires 62% alcohol to kill germs, and that much alcohol can dry and irritate the skin. So most people just don't like to use it.

Now there's AIRX 200 Instant Hand Sanitizer that does not depend on alcohol as its active ingredient, yet it still kills germs in only 15 seconds. Because it is dispensed in an easy to spread bubbly foam, one uses only half as much to do the same job. Without all that alcohol, AIRX 200 is kinder to the skin plus it has added Aloe and vitamin E for legitimate lotionizing.

### DESCRIPTION

AIRX 200 is a unique sanitizing formula using the modern quaternary compound Benzethonium Chloride as the active ingredient to kill germs – not isopropyl alcohol. The unique formula and special dispenser valve combine to deliver an easily spread foam that kills germs using half as much product. It will not dry your hands even with frequent use, has residual effective-

ness, and with its Aloe and vitamin E, it really is lotionized.

### USES

Excellent to control infectious microbial organisms on the hands when water is not available or inconvenient for use. Airx 200 contains emollients and humectants so that it can be used frequently without irritating the skin. It reduces the risk of cross contamination and improves sanitation, while its foaming action reduces waste.

### BENEFITS

*FAST ACTING* - Kills disease-causing organisms on contact in only 15 seconds.

*KINDER TO THE SKIN* - No isopropyl alcohol to irritate the skin. Contains Aloe and Vitamin E for a lotionized feel.

*CONTAINS BENZETHONIUM CHLORIDE* - Uses a uniquely effective quaternary compound instead of alcohol as the active ingredient.

*SAVES MONEY* - Combination of the unique formula and the dispenser valve produce a foam that uses half as much product to do the job.

*THREE SIZES* - Each with foamer valve.

(1) 50 ml personal, pocket/purse size.

(2) 950 ml bottle, attractive enough to sit in the open. Bracket available to hang on wall

(3) 1000 ml for use in attractive lockable cabinet.

*NO DRIPPING* - 62% alcohol products can remove floor finish and damage furniture, valves are often at the bottom of cabinets where they can leak. AIRX 200 will not harm finishes. Our valves are on the top where they will not leak.

*ADA COMPLIANT DISPENSER* - The 1000 ml cabinet features an easy to push pad, (less than 5 lbs. of pressure required) and only one hand or elbow to operate, as specified by Americans with Disability Act.

*MULTI-LINGUAL LABELING* - Directions for use on each 950 ml bottle and 1000 ml bag are in English, French and Spanish.
