

INDO 500

INDO 500 is an industrial strength alkaline cleaner concentrate formulated around the most up-to-date cleaning technology available today. It contains twice the active ingredients of many alkaline cleaners presently being sold thus making it extremely low cost to use.

This versatile cleaner incorporates emulsifiers, soil destructive and peptizing agents that synergise the action of the builders to provide rapid, complete oil and dirt breakdown. These oily contaminants are emulsified and dispersed completely so that they do not interfere with rinsing. Built-in water softeners ensure that water hardness in make-up water is tied up and does not remove any cleaning power.

INDO 500 will easily clean most plastic, rubber, porcelain, concrete as well as a va-

riety of metal surfaces without leaving a white residue on the surface after rinsing. It will take on any cleaning chore from light duty to the toughest. It is safe on most surfaces that can be cleaned with water.

INDO 500 offers the following advantages over other industrial cleaners.

Extra strength — low cost-use.

Biodegradable — contains no phosphates, reduces disposal problem.

Non-toxic and non-flammable — safe for employees to handle.

Contains no free hydroxides — will not clog steam cleaning and high pressure hot water machines.

Rapid penetration — great in automatic scrubber machines

Versatile — may be applied by hand, immersion, spray, steam gun, high pressure hot water or scrubber.

Liquid — easily diluted and totally dissolved, unlike powdered products.

APPLICATIONS:

- air filters
- air conditioning ducts
- brick (boilers, fireplaces)
- conveyors
- diesel power units
- engines
- exhaust stains
- flues
- general maintenance
- kitchen ranges
- light fixtures
- oil based paint surfaces
- pipes
- presses
- tile
- white wall tires
- food plants

USE: Dilute with water to emulsify and disperse oil, grease, soil from hard surfaces. May be used hot or cold.

LIGHT SOIL: Dilute 1:40 to 1:100

MEDIUM SOIL: Dilute 1:20 to 1:40

HEAVY SOIL: Dilute 1:5 to 1:10

FORM: Liquid

COLOUR: Aqua

ODOUR: Mild - no perfume added

% NON VOLATILE: 20

pH AS SUPPLIED: 12.8

pH 1% SOLUTION: 11.2

PHOSPHATES: None

FLASH POINT: None

FOAM: Medium

BIODEGRADABILITY: Yes

FREE CAUSTIC: None

WATER SOLUBILITY: Infinite

SURFACTANT SYSTEM: Blended mildly cationic

SURFACE SAFETY: Safe on most common hard surfaces. Do not use on water based paint. Always check small area of aluminum surfaces as some alloys darken.

CAUTION: INDO 500 is a concentrated alkaline cleaner. Concentrated product can cause irritation. Avoid contact with eyes, skin and clothes. Read MSDS thoroughly before using.
